

ASE 456 Individual Project - User Manual

Features

→ Record List Feature

This feature allows users to see all the task that has been inputed into the application by the user. This is invoked upon starting the application and updates after adding a new record to the system.

- Screen: Home Page

→ Add a Record Feature

This feature allows users to add records to the database and see a list of the results.

- Screen: Add a Record Page
- How to use: Users click the add button in the lower section of the app and will be navigated to a page that will allow them to add a new record into the system.

Users need to fill out task title, tag, date, from, and to. After that is filled out, the user will then be navigated back to the home page, where the user will see the updated list of records.
