ASE 456 – Requirements Document

User Stories
- **As a student, I want to able to see a list of the tasks I have recorded so I can keep track of them.**
    - As a user, I want to open a page and see all the records I have entered in the application so I can check them later.
    - As a user, I want to see information such as the tag and date created on every list record so I can remember when I did the task and what it generally was about.
- **As a student, I want to record my time usage so that I can keep track of time usage.**
    - As a user, I want to open a dialog box with multiple text fields so that I can enter multiple inputs for my entries to the application.
    - As a user, I want to give my date information in the date text field so that I can enter the date input for my time/task entry to the application.
    - As a user, I want to give my 'from' time information in the 'from' text field so that I can enter the 'from' time input for my time/task entry to the application.
    - As a user, I want to give my 'to' time information in the 'to' text field so that I can enter the 'to' time input for my time/task entry to the application.
    - As a user, I want to give my task information in the task text field so that I can enter the task input for my time/task entry to the application.
    - As a user, I want to give my tag information in the tag text field so that I can enter the tag input for my time/task entry to the application.
